

Infrastructure improvement of existing wells that are used for drinking water in rural areas (Kopiliq i Poshtëm, Skenderaj)

You are helping towards quality improvement of water

You've made quite the difference in 2021! I am so thankful for the impact you're making in the lives of the families we serve. So many of these families wouldn't have had a chance for a safe drinking water without your support. Through your generous support, you provided 40 families with improvement of their existing wells and made water much easier accessible and safer to drink. This past year 40 families received assistance from WFLK. Average number per family is 5 which means around 200 people have clean water now! Our main objective of the project is to improve the wellbeing of a family by meeting their basic needs in the aspect of water, sanitation and hygiene in those remote/rural areas where access to safe drinking water is a big challenge. By helping these communities have access to a better drinking water infrastructure, their basic life spheres are directly improved such as their health, social life, economic situation, environment etc. Through accomplishment of this objective all family members are affected especially women and children are the ones to benefit the most. Due to the fact that women in these areas are in charge with cleaning, cooking, hygiene and many other responsibilities that are closely related to water.

The impact you're making in the homes includes: better infrastructure and safer water. As we look forward to 2022, we know you'll be excited to learn that we are continuing to identify more families that are in need for our project and hoping to also start with some WASH education training at local schools. With your help, we will continue to meet the need for safe water and educational needs of children!

We are very grateful for all the support from different groups. Water for Life Kosovo relies on the generosity of donors such as ***Water for Life Institute*** and is grateful for all the support we got from you in this year.

WFLK's team

Here are 10 out of 40 projects finished in the year of 2021:

This project has been completed at S.Sh's family.

His request to WFLK was to assist him in paving and isolating the well with cement and reinforcement, and then in installing pipes, cable and an electric pump to bring water inside their house. This project was finished successfully and they are thankful for this great help. As a result seven people have safe drinking water now.

This is the situation at our first visit and after we assisted with our project, now he has water inside the house and water for his crops.

This project has been completed at S. Sh's family.

His well was unprotected from the rain, trash, sewage and other possibilities to be polluted. He requested was to put a cement ring with the lid, to pave and isolate the well with cement and reinforcement, and install pipe, cable and an electric pump to bring water inside their house. Now, this project is completed, they are thankful to ***Water for Life Kosovo*** and as a result 6 people have better and safe drinking water.

The condition of the well when we first visited and after the work was done. This well now is protected from pollution and water is much safer to be used.

This is the situation at our first visit and after we assisted with our project, now he has water inside the house and water for his crops.

This project is completed at I.Sh's family.

His well was unprotected from the rain, trash, sewage and other possibilities to be polluted. He requested to put a cement ring with the lid, to pave and isolate the well with cement and reinforcement, and install pipe, cable and an electric pump to bring water inside their house. Now, this project is completed, they are thankful for this great help and as a result 4 people have better and safe drinking water.

Before, during the work and after the project is completed.

Our Thanks

We are very grateful for the support from many different groups. Your contribution in 2021 has helped to complete the work of 40 wells/families. The difference this makes in the lives of families struggling to make a living and raise their families are very great. Water is something we take for granted, but it is an essential need, and we cannot live without it for very long. The families of Kopiliq i Poshtëm have suffered much since the war in 1999, but our projects, supported by your donation, are giving them new hope for the future. As one man from the village said “We felt like we were forgotten, but your help has shown us that we have not been forgotten.”
